

Secret Diary of a Beauty Addict

"I thought I'd write about my favourite new accessory called Gripeze, which is a heat resistant, non-slip silicone glitter mat designed for all hot hair tools like straighteners! I don't know about you guys but I am always dropping my straighteners and they slide off my dressing table... pain!

This mat grips onto your dressing table and protects it by absorbing heat to prevent damage AND changes colour when your hair tools are hot, giving you a warning – how clever is that! You can also simply roll your straighteners up in the mat and take with you when you are going away."

Lauren Loves - Gripeze Review

"How many times have you (or nearly!) burnt your carpet/furniture/self with those damn hair straighteners? ;)

I was kindly sent 'Gripeze' in the post last week, which basically makes hair straightener headaches a thing of the past.

How cool is this? It's basically a bright pink sparkly mat (complete in a box and Velcro fastener for easy storage) to place your hair tools when not in use.

I don't know why someone didn't think of this much sooner - it's genius! The heat-resistant, non-slip silicone mat is designed for all hair tools and helps protect surfaces from heat damage up to 250 degrees Celsius.

The really ace thing about Gripeze is that you can roll your hair tools up in them and pack them away in an overnight bag (when you're away) and you don't have to worry about your clothes getting burnt.

Top notch! I've been using mine for a couple of days now and it's great. Has anyone else got one of these?"

gripeze

Five lucky Fringe readers will win the brand new product, Gripeze. This innovative mat protects surfaces from heat damage, is heat resistant to 250°C and changes colour with heat. It will grip to surfaces, helping to prevent accidental dropping of hot tools, and can be rolled round straighteners to prevent burns.

The first five readers to call PHA Ltd on 01489 589553 will get a Gripeze completely free!

Gripeze is a heat-protective, non-slip mat for use with all hot hair tools, which changes colour with heat. It grips surfaces to stop straighteners slipping off whilst helping to protect surfaces from damage. It is heat resistant to 250°C and can also be used to roll up hot straighteners.

Professional Hairdresser has five of these handy mats to give away so circle the readerlink number 130 to get your hands on one.

Protect surfaces

There's nothing more irritating than burning an unattractive scorch mark into your bedroom carpet or dressing table with curling tongs or hair straighteners. The Gripeze silicone heat mat absorbs heat to stop damage to surfaces, and also doubles up as a safety device – changing colour to let you know when your hair tools are hot.

GRIPEZE® – THE HOT HAIR ACCESSORY

Tested by Carolyn Truscott

'If you're like me and want to use your hair straighteners before you go out after work, but it takes ages for them to cool so you can't put them away again, this mat is for you. Just roll your hair tool up in the mat, tie with the band and you're good to go! The heat-resistant mat will

protect surfaces from heat damage up to 250°C, so it's useful to have at home, too. And it even changes colour when your hair tools are hot so you know not to touch them.'
